

Technical Product Manager Neighborhood Trust Financial Partners

Position Title: Technical Product Manager (FinTech)

Location: New York, NY / Flexible

Posting Date: February 23, 2017

Are you passionate about making technology work better for disadvantaged communities? Are you looking to bring your technology and product skills to an established social venture on a growth trajectory? If so, consider this new, high-ownership role shaping our product building efforts.

Job Description

The Technical Product Manager is responsible for identifying, concepting and building our internal and external technology applications designed to improve the lives of low income households. The Technical Product Manager will a) help to codify the product and technology roadmap by synthesizing the needs of business stakeholders and partners, b) run and manage the agile development work streams and manage internal and external engineering resources, and c) develop and actively manage the development timelines, budget and work streams.

The ideal candidate will have an engineering background and the technical know-how to tell us and our partners what's possible. This role will be instrumental in shaping Neighborhood Trust's technology and product roadmap, working closely with internal experts and external stakeholders.

Who We Are

Neighborhood Trust's mission is to empower low-income individuals to become productive participants in the U.S. financial system and achieve their financial goals. Neighborhood Trust serves over 6,000 clients each year via its elite corps of Financial Advisors and is an industry leader in the financial inclusion field. We are cultivating our model as a scalable social venture that incubates technology-led financial services innovations for low income households. We are growing quickly with strong support from leading foundations and strategic partnerships helping us achieve national scale. In 2015, our WageGoal product was a winner of JP Morgan Chase's Financial Solutions Lab (<http://finlab.cfsinnovation.com>) challenge.

What you'll do

- Identify, build, ship and iterate on products that will directly impact our partnerships
- Build tools that include, but aren't limited to: source code repository, hosted pages, client specific use cases

- Collaborate closely with our content experts on financial services/counseling for low income Americans, helping us to think about how technology can increase our reach and impact
- Have a deep understanding of technical requirements and technical documentation

Basic Qualifications Needed:

- Background as a software engineer or a Computer Science background
- Previous experience as a product manager within an agile environment
- Deep technical understanding. Experience coding required
- Excellent organizational, writing and interpersonal skills in both technical and non-technical communications

Preferred Qualifications:

- Experience building out integrations
- Knowledge and interest in UI/UX design

More about Neighborhood Trust

We have launched two Fintech social ventures and are seeking an engineer to help us refine the products, create a product roadmap, and drive technology integration with joint venture partners and existing technology solutions:

- WageGoal (<http://www.wagegoal.com>) is a social venture focused on solving the financial challenges of underserved workers by providing employees controlled access to earned wages before payday coupled with an easy, intuitive cash management tool. The product is being developed in partnership with FlexWage Solutions, an established company that uses payroll technology innovations to improve financial access and well-being for low and middle income populations. Built on Ruby on Rails.
- We are taking our best-in-class financial counseling service virtual, designing user-friendly applications that generate trust and a willingness to take actions that will improve users' financial lives, and creating streamlined back-end data handoffs to our existing technology platforms. We are offering this service at employers nationwide as the core offering of a financial wellness program designed to improve the financial health of employees. Built on Java.

To Apply

Neighborhood Trust is committed to a workplace culture of collaboration and respect. We are dedicated to ongoing professional development for our employees, supporting career growth and opportunities for advancement within the organization. To apply please send your resume and cover letter to hr@neighborhoodtrust.org. Include "Technical Product Manager" in the subject line of the email.
